FalconStor Software Announces Fourth Quarter 2016 Results

MELVILLE, N.Y., March 9, 2017 - FalconStor Software, Inc. (NASDAQ: FALC), a market leader in software-defined storage, today announced financial results for its fourth quarter ended December 31, 2016.

"We continue to add new FreeStor® customers and are seeing more existing FalconStor legacy customers switch to FreeStor for all of the benefits that a software-defined solution can provide in today's transformation of the storage industry," said Gary Quinn, President and CEO. "Although sales of our FreeStor offering continue to grow at respectable growth rates, we are seeing our legacy customer base move from our traditional backup solutions to modern backup solutions and this trend has not yet been eclipsed by the success of FreeStor."

Business Highlights:

- The Company added 10 new customers or conversion customers from the install base utilizing the FreeStor subscription model during Q4 2016 and 39 new customers or conversion customers from the install base utilizing the FreeStor technology perpetual license model during Q4 2016.  - FreeStor technology perpetual license business, excluding the OEM business, bookings increased 4% in FY 2016 as compared with FY 2015 results.
- Customers who purchased FreeStor or the FreeStor Technology during FY 2015 expanded their storage capacity by 22% during FY 2016.

- During November 2016, we announced the general availability of version 9.0 of our Continuous Data Protection, Network Storage Server and Optimized Backup and Deduplication products. We continue to support our legacy customers and look to convert them to FreeStor, but this will most likely be the last major release for the legacy products with minor releases still planned as well as compatibility with infrastructure updates.

Industry veteran Mr. Rudolph brings extensive technology industry experience, having previously served as vice president of a number of key business units at IBM, including networking and storage, during a successful 32-year career within
